Plastic Solutions, Inc.

## FOR IMMEDIATE RELEASE

### **Plastic Solutions, Inc. Achieves ISO 9001:2008 Certification**

*Milton, Georgia - September 22, 2016 - Plastic Solutions, Inc.* a leading distributor of thermoplastic resins announced today that it has achieved ISO 9001:2008 certification.

The International Organization for Standardization ("ISO") is the world's largest independent non-governmental developer of International Standards to support innovation and provide solutions to complex global business challenges. International Standards are developed to ensure that products and services are consistently safe, reliable and of good quality. ISO 9001 is widely recognized and respected worldwide as the preeminent Quality Management Standard for organizations who want to ensure that their products and services consistently meet customer's requirements and that quality is continually improved. Achieving this certification is a significant benchmark in Plastic Solution's commitment to providing the highest level of satisfaction and continual quality improvement for its customers.

Becoming ISO 9001 certified is a lengthy and detail-oriented process designed to develop, implement and control a formalized Quality Management System ("QMS") that incorporates mapping of process flows, creating documented procedures and forms, training employees, regularly performing internal and external QMS audits, addressing corrective & preventive measures and holding management reviews at scheduled intervals. Implementing a QSM to ISO Standards requires resolute management commitment and continual support to improving the QMS.

The culmination of Plastic Solution's QSM development was formally reviewed, audited and certified by DNV-GL, one of the world's leading certification bodies that operates in over 100 countries. Plastic Solutions, Inc. Quality Management System: ISO 9001:2008 was awarded Certification No. 205918-2016-AQ-USA-ANAB.

Bradley B. Morgan, President & CEO stated "We are proud of this achievement which demonstrates our commitment to providing the highest standards of quality management, continually improved processes and an ongoing level of excellence within our organization. This step proves our stability and dependability as a business partner and our ongoing commitment to providing the highest levels of customer satisfaction."

Plastic Solutions, Inc. is a leading distributor of prime branded thermoplastic resins, offering a wide variety of prime grade materials for injection molding, blow molding, extrusion and compounding with warehouses positioned in close proximity to numerous metropolitan centers across the United States.
